

Deliver leaflets safely.

How valuable are your fingers to you?
PLEASE don't risk life-changing injuries too
graphic to show here.

**Ten irreplaceable reasons
for all leafleters to use**

Postie MateTM

Registered design. Patent Pending.

Wooden prototype

Dogs bite 5,000* Posties and other workers each year. Some have even lost whole fingers. *UK Communication Workers Union estimate

Benefits of *Postie Mate*TM

- No hands through letterboxes means no dog bitten/lost fingers.
- A5 Leaflets or magazines land flat, unfolded, in pristine condition – even through two sets of letterbox bristles - making their intended impact within a few seconds of viewing.
- Speeds up leaflet delivery by up to 50%.

YOU need *Postie Mate*TM

- “Everyone thinks they’re invincible until it happens to you,” says inventor & professional pianist David Meacock who was unable to play for 6 months luckily only temporarily losing his RH index finger nail.
- David has delivered over 15K leaflets with the wooden prototypes, and *Postie Mate*TM has been informally endorsed by top Royal Mail Group Health & Safety professionals.
- Passionate about protecting others, David has developed his *Postie Mate*TM prototypes for YOU.

He pleads: ***“Please never deliver another leaflet again without using *Postie Mate*TM. The risk of a life-changing injury isn’t worth it.”***
